

FOR IMMEDIATE RELEASE

March 03, 2010

NM WIRED High-Tech/Green-Tech Virtual Job Fair

The NM WIRED virtual career fair is a one-of-a-kind high-tech/green-tech career fair that will be held March 15-19, 2010. Apply directly to participating company representatives and have access to the latest technology job opportunities! This virtual job fair is free, user-friendly and allows you to engage with potential employers in real-time.

This NM WIRED virtual career fair will help job seekers avoid the inconvenience of traditional job fairs, including commuting long distances, waiting in long lines and dealing with exhausted recruiters.

Currently in attendance: Air Force Research Laboratory, Applied Research Associates, Ball Aerospace and Technologies Corporation, Emcore Corporation, Los Alamos National Laboratory, nanoMR, TEAM Technologies Inc., TMC Group, and more to come.

NM WIRED is a federally funded comprehensive effort that brings together businesses, national laboratories, investors, economic developers, educational institutions, workforce development and advocacy organizations, and government officials. Together, we move New Mexico forward by ensuring that all New Mexicans are receiving access to high quality green manufacturing employment opportunities.

The NM WIRED virtual Career Fair is New Mexico's leading technology job resource, providing great jobs across New Mexico. Visit www.nmvirtualjobfair.com to apply.
